PROFESSIONAL PROFILE

Cloud-focused technology leader. Rapid Learner & Innovative Problem Solver.

Dedicated computer science professional with a passion for adopting and delivering cutting-edge solutions in cloud environments.

Proven ability to thrive in fast-paced settings, adapting to new technologies with creative solutions.

Proficient in full-stack development.

EXPERIENCE

VICE PRESIDENT

APR 2022- 2024

Cloud Community Club

- Assisted with special events and programs.
- Maintained clean, neat, and operational facilities to serve program needs.
- Managed the smooth flow of fundraising events by helping with organization and planning.

ASSISTANT LECTURER

APR 2023- 2024

Institute Of Electronics

- Taught the nuances of Cloud Computing at the government college due to the absence of a qualified lecturer for the topic.
- Took the initiative to step up and teach cloud computing to my batch, ensuring that peers gained a solid understanding of the subject.

PROFESSIONAL PROJECTS

DEEPSYNC: A PRODUCTIVITY PLATFORM

AUG 2024- DEC 2024

- Developed a productivity app using Python, PyQt5, and SQLite.
- Implemented features like Pomodoro timers, soothing music, task-based deep work cycles with stunning UI enhancements.
- Integrated motivational quotes, reminders, and idle screensavers to encourage sustained work-blocks.
- Website-blocking functionality to enhance focus.

PERSONAL PROJECTS

SERVER SENTINEL

- Developed a server monitoring system using Selenium and AWS Lambda to automate availability checks.
- Implemented automated email alerts for server status changes (up/down).
- Integrated cron jobs for scheduled and reliable execution.

ARCH LINUX CUSTOMIZATION AND RICING

- Created a highly efficient and aesthetic workflow. Implemented automated email alerts for server status changes (up/down).
- Enhanced productivity through personalized scripting.
